

Atik Flooring Solutions

ATIK TRAINING COURSES

At Atik we want to ensure that our customers are able to fit flooring products, with ease and confidence. Flooring systems are different and therefore we have devised a series of training courses developed for fitting all flooring types including Atik's Easi-fit (SPC) Click, LVT, Vinyl Sheet and Carpet ranges, as well as for sub-floor preparation – a key process for laying any type of floor. We can also train surveyors on how to carry out more accurate measurements to account for waste when using sheet vinyl or carpet.

- Courses for all flooring types
- Either at our Yeovil warehouse or at a location of your choice
- Train up to 4 delegates on each course
- Bespoke courses tailored to the requirements and skill level of attendees
- All tools and materials will be provided.

Our trainers have years of experience in fitting all flooring products and will cover, subfloor preparation, product knowledge, adhesives (as required), handling and fitting plus the effective use of tools.
